and under.

12 Pack

EACH PAD LASTS UP TO 3 MONTHS

MADE IN THE USA

PURAFILTER 2000.

Vent Filters

Why use Purafilter 2000[®] vent filters?

- When air flows through the vent filter, dirt, dust and pollen size particles are trapped. Filtered air then passes back into your house.
- Keeps dirt & objects from falling into ducts.

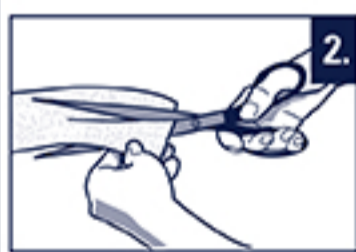

Use in bathrooms, bedrooms, kitchen, family room and baby's room (*See below).

Easy installation:

1.

1. Remove register vent.

2.

2. If needed, cut vent filter with household scissors using your register vent as a guide. Most vents will be 2 1/4" x 12", 4" x 10", or 4" x 12".

3.

3. Install in bottom of register as shown or in register opening.

To prevent air flow restriction and for maximum filtration, inspect filter regularly and replace when dirty, approximately every 90 days.

* Note: Do not use in every vent in your home. This could cause airflow restriction and damage your furnace/AC unit.
