

BASIC protection™

Filters Larger Airborne Particles

28 times more effective than fiberglass filters

Reduces: Dust/lint, Dust mite debris, Pollen¹
and Pet Dander

LASTS UP TO

3

MONTHS

MADE IN THE USA

BASIC protection™

How to select an air filter

Pay close attention to the FPR (Filter Performance Rating) number, which you'll find prominently displayed on all our filters. The FPR is an independent rating system developed to assist consumers in selecting the best filter for their family. A higher FPR indicates better filter performance.

With all air filter purchases, be sure to refer to your heating/cooling system Owner's Manual to ensure the filter you are about to use is compatible with your system.

Filter life

We recommend changing your BASIC protection™ filter every 3 months. However, unusually dirty air ducts, the presence of pets, smoke, or construction in your home can affect the efficiency and life of your filter. Under these conditions, you should change filters more frequently.

Installation Instructions

 **Arrows show direction of AIR FLOW through filter.**

- STEP 1:** Remove plastic wrap and/or packaging material from filter. Do not cut or remove cardboard frame. **WARNING: TO AVOID DANGER OF SUFFOCATION, KEEP THIS FILM AWAY FROM BABIES AND CHILDREN.**
- Insert filter into designated opening in your furnace or air conditioner system with the arrows on the frame pointing towards the furnace or air conditioner blower/fan.

Replacement reminder

Register at www.protectplusair.com and we'll notify you by email when it's time to replace your filter.

† FPR (Filter Performance Rating) is a rating system proprietary to The Home Depot that tests the filter's ability to capture 1) large particles, 2) small particles, and 3) weight gain (filter lifetime).
