

# AC Flow

## Evaporator Coil Cleaner

**Cleans and dissolves soil and deposits on evaporator coils without harming the metal coils.**

**Special formulation is ready to use without diluting or mixing. Sprayer will maximize cleaning ability in hard to reach places.**

- **Contractors' Choice** ■ **No Acids Added**
- **Helps Maintain Efficiency of Unit**
- **Cleans Stubborn Soil and Deposits**

**Net 32 Fluid Oz.**

**(1 U.S. Quart)  
(946 mL)**

**CAUTION: Keep out of reach of children.  
Use only as directed. Read caution on back.**

### How AC Flow works

Be sure the air conditioning system is turned off. Liberally saturate the coil area. After waiting a few minutes, gently brush the fins, being careful not to bend the metal, and avoid contact with electrical wiring or the motor. Rinsing thoroughly with a garden hose is recommended, but if not readily available, the "no-rinse formula" option allows you to turn the system on for 30 minutes, and the condensation will rinse the coils. The coils must be rinsed if the equipment is going to sit unused for a period of time. Repeating the process may be necessary in the case of heavy build-up of soil.

### Caution

1. Keep out of reach of children,
2. Do not ingest,
3. Avoid prolonged contact with skin,

**First Aid:** If ingested; seek immediate medical attention. If on skin; rinse with soap and water. If in eyes; flush immediately with large amounts of water and seek immediate medical attention.

**Storage:** Store in a cool, dry area.

**Note:** This product contains degreasers and surfactants in an alkaline formula.
